OBJECTIVE

Motivated and detail-oriented BCA student seeking an internship opportunity to apply my programming knowledge and gain hands-on experience in software development and IT projects. Eager to contribute to a dynamic team and enhance my skills in a real-world work environment.

EXPERIENCE

IBM SkillBuild – Virtual | July 2025 – August 2025

- Completed a 30-day internship on “Decoding Data: Insights & Impact through Analytics”, gaining hands-on experience in data analysis, visualization.

Google Student Ambassador | December 2025

- Represented Google on campus by promoting Google products, programs, and initiatives
- Organized and participated in technical workshops, info sessions, and community events
- Worked as a connection between Google and students, improving awareness and engagement within the campus community

EDUCATION

- HIGHER SECONDARY EDUCATION [69.67%]**
Hossana Mision, Ahmedabad April, 2023
- Bachelor Of Computer Application [8.4 CGPA]**
K N University, Ahmedabad 2023-2026

PROJECTS

AuraShop – Premium Full-Stack E-Commerce Platform:

- Developed a modern full-stack e-commerce platform using **Python, Flask, PostgreSQL With Supabase, HTML, CSS, JavaScript, and GSAP** with a premium glassmorphic UI and smooth animations. Implemented secure user/admin authentication, AJAX-based shopping cart, Razorpay payment integration, and responsive frontend design. Also advanced features including product reviews & ratings, digital invoice generation, delivery tracking system, and a dedicated admin dashboard for product and order management. [<https://auroshop.onrender.com>]

Smart College Management System:

- Developed a full-stack College Management System using **Flask, PostgreSQL, HTML, CSS, JavaScript, and Bootstrap 5** with role-based dashboards for Admin, Faculty, Students, and Accountant. Implemented student management, auto-generated enrollment numbers, timetable, exams, fees management (Razorpay, Cash), and notice modules. Also a secure **QR-based attendance system** with time-limited QR generation, real-time attendance tracking, analytics, and fraud detection using device/IP logging.
